PROFESSIONAL PROFILE

- An organized and goal-driven Computer Science graduate (BCA) from Islamia College of Science and Commerce, Srinagar, with a solid foundation in both front-end and back-end development. Known for being responsible, adaptable, and always ready to take on challenges.
- I bring hands-on expertise in modern web technologies including HTML, CSS, JavaScript, and Bootstrap, along with back-end frameworks such as Node.js and Express.js. I have practical experience working with databases like MongoDB, MS Sql, and NeonDB, and I'm skilled in using ORMs such as Drizzle for clean and efficient database interaction.
- Eager to contribute my technical acumen and interpersonal strengths to dynamic projects that drive business and professional growth, I am committed to continuous learning and innovation in the field of software development.

PROJECT

Masjid Fund Collection System – Full-Stack Web Application

Description: Building a comprehensive platform for Masjid to make the collection of funds easy.
My Role: Led the Front End Development and Back End Development; collaborated on the frontend design and functionality and Backend Technologies.
Backend: Developed using ASP .net using Web Forms in C# , MS Sql, Ado .net
Features:

- CRUD Operation for President, Resident and Masjids
- Alternative for manual door to door.
- Monthly Email for Fund Transfer and particular masjid notification by President

Tools & Technologies: HTML, CSS, JAVASCRIPT. Git and Github for version control.
